PROFESSIONAL SUMMARY

Computer Science Engineering student with hands-on experience building and deploying software solutions. Skilled in applying possible techniques to solve real-world problems. Quick learner with a strong foundation in data structures, and end-to-end software development.

EDUCATION

B.Tech in Computer Science Engineering (Cyber Security) – Shri Vishnu Engineering College for Women

GPA: 8.19

Bhimavaram, AP

2023 – Present

EXPERIENCE

Research and Development Associate – Code Aurora

Nov 2025 – Feb 2026

- Built data-driven software solutions and predictive models for healthcare research initiatives, translating raw datasets into actionable insights that improved project workflows and decision-making
- Collaborated with cross-functional research teams to design and iterate on models, following structured development practices from data collection through deployment-ready output

Machine Learning Intern – AICTE Edunet Foundation

May 2025 – July 2025

- Developed and evaluated machine learning models using Python, Scikit-Learn, and Pandas, delivering a scalable, end-to-end predictive solution from data preprocessing through deployment
- Managed code versioning and deployment workflows using Git and GitHub, reusable code throughout iterative development cycles

Google Student Ambassador 2025 – Gemini

Aug 2025 – Feb 2026

- I prompted Goggle Gemini among students, conducting awareness activities, peer-learning sessions and encouraging students to explore Gemini AI tools

PROJECTS

QRx – A Smart Health Aid

grx-smart-health-aid.vercel.app

Tools: React, Typescript, CSS, Google Firebase, QR Server API, Vercel

- Built a full-stack web application enabling users to create and securely manage digital emergency health profiles, including blood group, allergies, medications, and emergency contacts
- Generated unique QR codes linked to each user's profile for fast, reliable access to critical health data during emergencies, using the QR Server API

Water Quality Prediction System

waterqualitypredictionml.streamlit.app

Tools: Python, Pandas, Scikit-Learn, Streamlit, Html, Css

- Built and deployed a full-stack machine learning application predicting water quality from environmental datasets, integrating a trained ML model into a production-ready web interface
- Engineered a reusable, scalable data pipeline covering preprocessing, exploratory data analysis, and model deployment, reducing manual steps in the prediction workflow

SKILLS

Programming Languages: Java, Python, SQL

Software Development: Data Structures & Algorithms, OOP, Version Control (Git/GitHub)

Web & Deployment: HTML, CSS, Streamlit, Vercel, VS Code

Cybersecurity: Basics of Wireshark, Kali Linux, phishing detection

Soft Skills: Analytical Thinking, Problem Solving, Team Collaboration

HONORS & AWARDS

- Amazon Foundation For Excellence Scholar (2023–2027)** – Received a 2 lakh scholarship for a 4-year B.Tech program and a Lenovo laptop from Amazon, recognizing academic excellence
- Technical Paper Presentation – Special Jury Prize (2024)** – Won the Special Jury Prize for an outstanding technical paper presentation on “Cyber Crime and Protection,” demonstrating strong research and presentation skills in cybersecurity

CERTIFICATIONS

- [Salesforce](#) – Trailhead Agentblazer Champion (2026)
- [AWS Educate](#) – Machine Learning
- [Cisco](#) – Introduction to Modern AI
- [IBM](#) – Mastering the Art of Prompting
